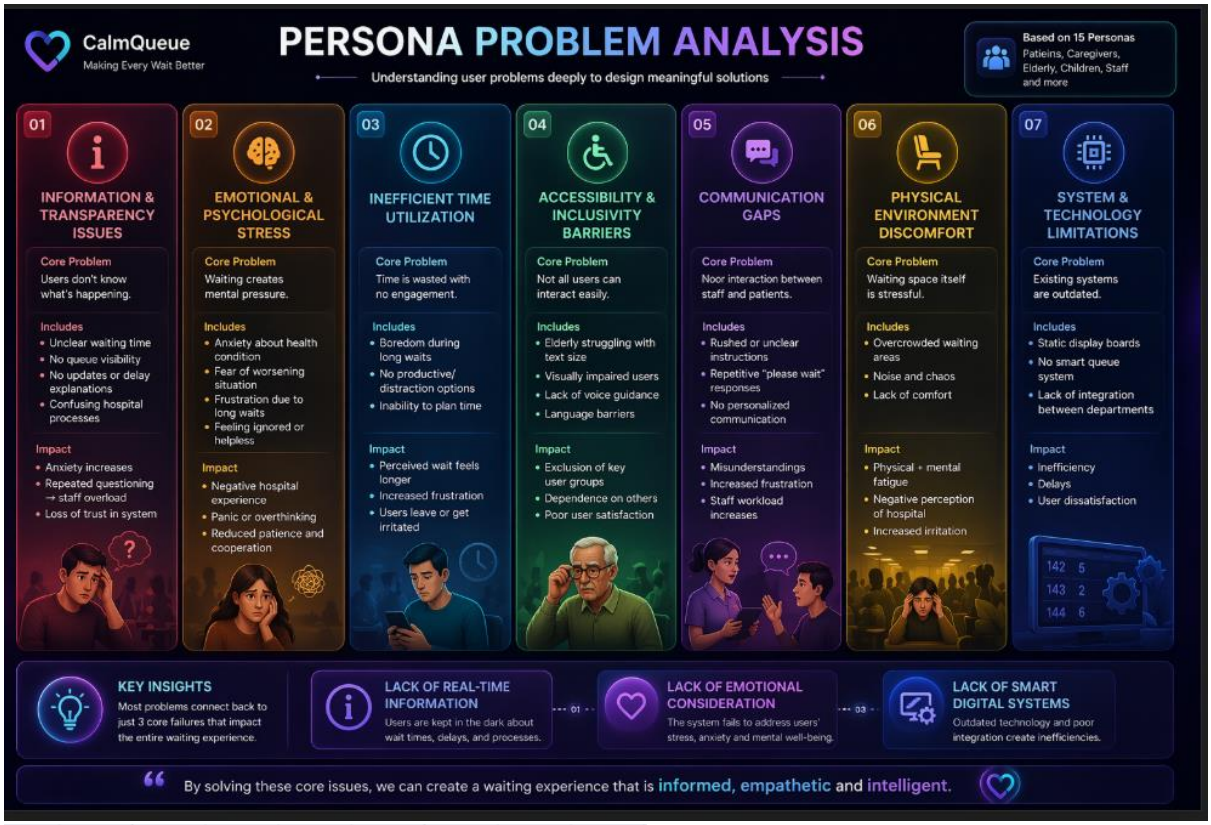
Analysis



CalmQueue
Making Every Wait Better
PERSONA PROBLEM ANALYSIS
Understanding user problems deeply to design meaningful solutions
Based on 15 Personas
Patieins, Caregivers, Elderly, Children, Staff and more
01
INFORMATION & TRANSPARENCY ISSUES
Core Problem
Users don't know what's happening.
Includes
• Unclear waiting time
• No queue visibility
• No updates or delay explanations
• Confusing hospital processes
Impact
• Anxiety increases
• Repeated questioning → staff overload
• Loss of trust in system
02
EMOTIONAL & PSYCHOLOGICAL STRESS
Core Problem
Waiting creates mental pressure.
Includes
• Anxiety about health condition
• Fear of worsening situation
• Frustration due to long waits
• Feeling ignored or helpless
Impact
• Negative hospital experience
• Panic or overthinking
• Reduced patience and cooperation
03
INEFFICIENT TIME UTILIZATION
Core Problem
Time is wasted with no engagement.
Includes
• Boredom during long waits
• No productive/ distraction options
• Inability to plan time
Impact
• Perceived wait feels longer
• Increased frustration
• Users leave or get irritated
04
ACCESSIBILITY & INCLUSIVITY BARRIERS
Core Problem
Not all users can interact easily.
Includes
• Elderly struggling with text size
• Visually impaired users
• Lack of voice guidance
• Language barriers
Impact
• Exclusion of key user groups
• Dependence on others
• Poor user satisfaction
05
COMMUNICATION GAPS
Core Problem
Noor interaction between staff and patients.
Includes
• Rushed or unclear instructions
• Repetitive "please wait" responses
• No personalized communication
Impact
• Misunderstandings
• Increased frustration
• Staff workload increases
06
PHYSICAL ENVIRONMENT DISCOMFORT
Core Problem
Waiting space itself is stressful.
Includes
• Overcrowded waiting areas
• Noise and chaos
• Lack of comfort
Impact
• Physical + mental fatigue
• Negative perception of hospital
• Increased irritation
07
SYSTEM & TECHNOLOGY LIMITATIONS
Core Problem
Existing systems are outdated.
Includes
• Static display boards
• No smart queue system
• Lack of integration between departments
Impact
• Inefficiency
• Delays
• User dissatisfaction

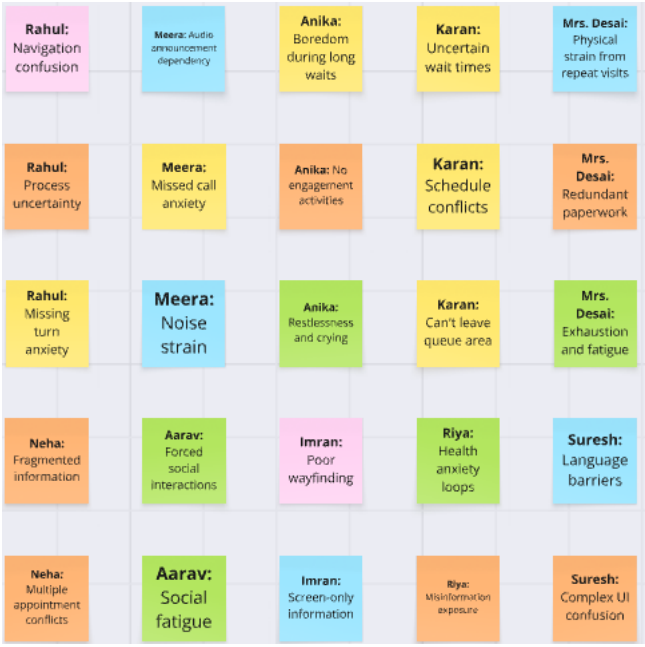
143 2
144 6
KEY INSIGHTS
Most problems connect back to just 3 core failures that impact the entire waiting experience.
LACK OF REAL-TIME INFORMATION
Users are kept in the dark about wait times, delays, and processes.
01
LACK OF EMOTIONAL CONSIDERATION
The system fails to address users' stress, anxiety and mental well-being.
03
LACK OF SMART DIGITAL SYSTEMS
Outdated technology and poor integration create inefficiencies.
By solving these core issues, we can create a waiting experience that is informed, empathetic and intelligent.



Rahul: Navigation confusion
Meera: Audio announcement dependency
Anika: Boredom during long waits
Karan: Uncertain wait times
Mrs. Desai: Physical strain from repeat visits
Rahul: Process uncertainty
Meera: Missed call anxiety
Anika: No engagement activities
Karan: Schedule conflicts
Mrs. Desai: Redundant paperwork
Rahul: Missing turn anxiety
Meera: Noise strain
Anika: Restlessness and crying
Karan: Can't leave queue area
Mrs. Desai: Exhaustion and fatigue
Neha: Fragmented information
Aarav: Forced social interactions
Imran: Poor wayfinding
Riya: Health anxiety loops
Suresh: Language barriers
Neha: Multiple appointment conflicts
Aarav: Social fatigue
Imran: Screen-only information
Riya: Misinformation exposure
Suresh: Complex UI confusion

Neha: Mental overload	**Aarav:** Need for private flow	**Imran:** Navigation dependency	**Riya:** Panic and rumination	**Suresh:** Tech intimidation
Pooja: Long standing discomfort	**Vikram:** Opaque queue rules	**Aditya:** Idle time with no engagement	**Sana:** Sensory overload	**Dr. Arjun:** Repetitive patient queries
Pooja: Safety risks	**Vikram:** Feeling ignored	**Aditya:** Time perception crawling	**Sana:** Noise and crowd triggers	**Dr. Arjun:** Constant interruptions
Pooja: Need for priority	**Vikram:** Delayed relief	**Aditya:** Restlessness	**Sana:** Panic attack risk	**Dr. Arjun:** Burnout and chaos
